

BETTER BUILDINGS TODAY

Zero•Net™ Fenestration

CURTAIN WALL | WINDOW WALL | OPERABLES | FIXED WINDOWS | RETROFIT

FreMarq Innovations

FreMarq is a manufacturer of architectural-grade glazed wall systems, including curtain walls, window walls, fixed windows, vents, and sunshades. We provide custom solutions to accommodate projects of any size and scope. Our primary focus is to reduce the energy consumption and carbon footprint of commercial buildings by improving the thermal efficiency of their envelope. This is made possible by our Zero•Net™ product line, which can help to "future-proof" a building by achieving efficiencies **more than twice that of current ASHRAE codes.**

New Construction: The Heights-
40,300 SF

Enhanced Envelope Performance

- ▶ Up to 65% reduction in greenhouse gas emissions in warm or cold climates
- ▶ Up to 65% reduction of energy cost in warm or cold climates
- ▶ Improved occupant comfort
- ▶ Increased usable/leasing floor space
- ▶ Passive approach to energy efficiency
- ▶ **Assembled U-values as low as 0.098**

Manufacturing Capabilities

As a customer-centric, all-in-one solution, we offer a wide range of services from pre-bid to installation support for all projects. Our manufacturing adaptability enables us to manage projects of various sizes and complexities. With FreMarq's strong work ethic, extensive 170,000+ square foot manufacturing facility, and a wealth of over 200 years of combined industry expertise, we are the ideal option for delivering top-notch fenestration solutions.

Retrofit Design

Aligned with global objectives to enhance envelope performance, FreMarq's retrofit system and service plan aim to enhance current low- to mid-rise curtain wall setups, often surpassing current energy standards. This adaptable system can integrate with most pressure bar curtain wall structures and can be customized for various product installations. By utilizing this innovative method, existing building envelopes can surpass the performance of new construction products on the market.

- ▶ Utilize existing aluminum framing, no complete tear-out necessary
- ▶ Eliminate condensation on framing
- ▶ Reduce HVAC maintenance costs
- ▶ Bring envelope up to/ beyond code
- ▶ Prevent unnecessary air leakage
- ▶ Improve energy efficiency

On-site Consultations

As part of our efforts to reduce carbon emissions, we offer complimentary on-site consultations to our customers. Understanding our customers' requirements fully is crucial to ensuring optimal performance of our retrofit system.

Green Initiatives

FreMarq is dedicated to fulfilling the energy needs of tomorrow. By collaborating with sustainable building associations, we aim to increase awareness of the positive impact our Zero•Net™ product line can have on achieving a building's energy consumption goals. Given that buildings contribute to around 40% of global energy consumption, we are committed to fostering a greener future.

Small Business Entity - HUBZone

FreMarq Innovations is a small business situated in a HUBZone, providing contractors with a 10% pricing advantage over competitors vying for the same government contract.

Made in the USA

FreMarq Innovations takes pride in being an American manufacturer, with all our systems produced in Wisconsin. Additionally, we exclusively source all materials from within the U.S.
